

JOSEPH NAGOTHU

josephnagothu4@gmail.com · (562) 538-7704 · [LinkedIn](#) · [Portfolio](#)

SUMMARY

Business Analytics graduate student (Pepperdine, GPA 3.8) with hands-on experience building production-grade interactive dashboards, conducting A/B testing, and applying statistical modeling to drive data-backed decisions. Proficient in Python, SQL, Tableau, and Streamlit.

EXPERIENCE

Data & Operations Analyst (Volunteer), [Exalt Properties, LLC](#), KY

Aug 2024 – Present

- Tracked rental portfolio performance by monitoring occupancy rates, revenue trends, and expense variances to surface operational insights.
- Built financial models to evaluate property-level profitability and conducted scenario analysis to support pricing and capital allocation decisions.
- Conducted comparable market analysis and potential rent assessments, presenting findings to the property management team to guide leasing strategy and pricing decisions.
- Collaborated with property managers to share data-driven insights on tenant trends, vacancy risk, and market positioning, enabling faster and more informed operational decisions.
- Created recurring stakeholder reports translating complex rental data into clear recommendations for the management team.

Leadership Team Member / Health Scholar, [COPE Health Scholars Program](#), Anaheim, CA Aug 2023 – Aug 2024

- Coordinated scheduling and tracked compliance metrics for 15+ health scholars, reporting weekly to program leadership.
- Trained and onboarded new scholars on hospital procedures, reducing ramp-up time for incoming cohorts.

Rock Wall Attendant, [California State University](#), Long Beach, CA

Jan 2024 – Nov 2024

- Managed logistics, equipment tracking, and scheduling for 20+ participants per session across climbing programs.
- Maintained accurate records of equipment condition and usage to inform procurement and maintenance planning.

TECHNICAL PROJECTS

Send It — Outdoor Conditions & Trip Planning App | [React Native](#) · [Expo](#) · [Supabase](#) ·

[REST APIs](#) · [JavaScript](#)

- Built a full-stack cross-platform mobile app (iOS/Android) for surfers, climbers, mountain bikers, and hikers to check real-time conditions and plan outdoor trips.
- Integrated OpenWeather, Open-Meteo Marine, and Google Places APIs to surface live surf, weather, and trail data; implemented MapScreen with spot search, My Sends log, and curated spot database.
- Developed complete ProfileScreen with AsyncStorage session management and SpotDetailScreen with food, bathroom, and gear cards; architecting App Store release via EAS Build.

Cookie Cats — LiveOps A/B Testing & Retention Dashboard | [Python](#) · [SQL](#) · [Streamlit](#) ·

[SciPy](#) · [Plotly](#)

- Analyzed a 90,000-player A/B test on gate placement; applied chi-square testing to produce a statistically-backed ship/no-ship recommendation.
- Built deployed interactive KPI dashboard with player segmentation, engagement distribution, and LiveOps performance insights.

Customer Behavior & Marketing Campaign Dashboard | [Python](#) · [Pandas](#) · [Plotly](#) ·

[Streamlit](#)

- Analyzed 2,237 retail customers across demographics and purchase channels to identify high-value segments and revenue drivers.
- Deployed live dashboard enabling stakeholder self-service exploration of customer cohorts and campaign performance.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, R, SPSS, Excel (Advanced), Tableau, Streamlit, Plotly, Pandas

Analytics: A/B Testing, Statistical Modeling, KPI Reporting, Financial Modeling, Monte Carlo Simulation, Customer Segmentation

Cloud & Platforms: AWS (Foundations), Google Cloud Platform, BigQuery, Microsoft Office Suite, MongoDB

Certifications: Google Cloud Data Analytics · PCEP Certified Python Programmer · CRUD Operations in MongoDB

EDUCATION

M.S. Business Analytics — GPA 3.8, [Pepperdine University](#), Malibu, CA

Expected Aug 2026

B.S. Biology, [California State University](#), Long Beach, CA

May 2025
